About this annual report

Mercer Investments (Australia) Limited (MIAL) ABN 66 008 612 397, Australian Financial Services Licence #244385, Registrable Superannuation Entity (RSE) Licence #L0003421 is the Trustee of the Mercer Super Investment Trust, (ABN 78 433 715 831, RSE Registration #R1067095) and the issuer of this Annual Report and a wholly owned subsidiary of Mercer (Australia) Pty Ltd (Mercer) ABN 32 005 315 917.

The Mercer Super Investment Trust is a “pooled superannuation trust” as defined under the Superannuation Industry (Supervision) Act 1993 (SIS).

The Mercer Super Investment Trust is referred to as the ‘Mercer Super Investment Trust’ or the ‘Trust’ throughout this Annual Report.

MIAL is referred to as ‘Trustee’, ‘we’ or ‘us’ throughout this Annual Report.

To invest in the Mercer Super Investment Trust, you will need to complete an application form included in, or accompanying, a current Mercer Super Investment Trust Product Disclosure Statement (PDS) which is issued by, and available from, the Trustee.

The information contained in this Annual Report includes general product advice which has been prepared without taking into account the personal objectives, financial situation or needs of individual investors. You should consider these matters, read the current Mercer Super Investment Trust Product Disclosure Statement and obtain personal financial advice from a licensed, or appropriately authorised, financial adviser before making a decision concerning your super.

The value of investments in the Investment Options may rise and fall from time to time. Neither the Trustee, Mercer, any entities within Marsh & McLennan Companies Inc, nor any of the investment managers, guarantees the investment performance, earnings or returns of capital invested in any of the investment options described in this Annual Report.

The investment returns shown in this Annual Report do not take into account the unique characteristics that apply to each investor (such as timing of cash flow). As a result, the actual investment returns applying to a particular investor may differ from the investment returns shown. You should also remember that past performance should not be relied upon as an indicator of future performance.

MIAL provides you with this Annual Report for the 2013/2014 financial year (1 July 2013 to 30 June 2014).

Trustee's investment philosophy and approach

The Trustee has put together a range of Investment Options that utilises a 'multi-manager' investment approach. In the following sections we describe this approach in more detail.

Investment philosophy

The Trustee's investment philosophy is to take full advantage of investment opportunities appropriate to an investor's risk profile by diversifying across asset classes and investment styles, and is implemented in a manner that aims to maximise investment efficiency. The Trustee believes that appropriate combinations of specialist asset-class investment managers can generally be expected to result in consistent, above average performance over time. The Trust's Investment Options have been developed to be consistent with this philosophy.

Investment approach

Under a multi-manager approach, specialist managers are appointed to invest assets in each asset class or sector. More than one manager may be appointed in an asset class to provide diversification. The underlying investment manager panels may be configured to achieve exposure to a range of investment management styles, with the overall objective of producing consistent performance throughout market cycles.

Growth Defensive Enhanced (GDE) process

To better measure the 'true' risk in a portfolio and to assist in balancing risks within the Funds, we have adopted the Mercer Growth Defensive Enhanced (GDE) process for all Diversified Investment Options. The GDE process involves a two-dimensional breakdown of each asset sector into its growth and defensive component. We assess the growth/defensive split for each Diversified Investment Option. The growth/defensive split is determined for each asset class using the GDE process and aggregated to the Option level.

A range of measures are used to assess where an asset class sits on the growth defensive spectrum, including the:

- Absolute risk of the sector, based on historical volatility of annual returns.
- Long term correlation of each asset sector with the share market, and presence of positive diversification benefits.

- Maximum potential downside risk (i.e. risk of negative returns), as guided by the past history of each asset class (measured on a 'peak to trough' basis).

Selecting and monitoring investment managers

The Trustee's Investment Strategy Team manages the selection, appointment, replacement and on-going evaluation of investment managers. They also review and report on investment manager performance against investment objectives using sophisticated measurement and analytical tools. These tools complement qualitative research performed into the operations of investment managers. The research helps determine whether an investment manager offers a sustainable competitive advantage.

Details of the investment managers are provided on page 6-8 of this Annual Report. We can send you a copy of the updated information free of charge on request.

The Trustee may remove, replace, or appoint additional investment managers at its discretion.

Investment option objectives

For each Investment Option, the Trustee has determined a strategy which it believes is reasonably likely to enable the option to meet its objectives. The strategy includes the selection of a long-term mix of investments (asset classes) that supports the option's objectives. This mix is chosen after considering the advice of the Trustee's Investment Management Team, which also provides advice on choosing and monitoring investment managers.

The Trustee's Investment Management Team uses sophisticated financial models based on historical data and economic forecasts to estimate each asset class's future performance. The models also estimate the probability of each projected return occurring.

The next step is to assess the optimum mix of asset classes likely to deliver the highest returns in the context of the investment objectives of each Investment Option. The optimum mix becomes the benchmark asset allocation for that option.

Changes are made to the objectives and strategies as required in order to ensure that the objectives continue to have a reasonable probability of being attained. In addition, the trustee monitors the options' performance against their objectives, with formal assessments and attribution analysis performed quarterly.

What are the Investment Options?

The Trust offers a range of Investment Options, each utilising the multi-manager investment approach and with its own set of investment objectives. The active investment options during the financial year 2013/14 are listed below:

Mercer Super Investment Trust Active Investment Options	
Shares	Mercer Australian Shares
	Mercer Diversified Shares*
Alternatives	Mercer Diversified Alternatives
Cash	Mercer Cash
Diversified	Mercer Conservative Growth
	Mercer Moderate Growth
	Mercer Growth
	Mercer High Growth

* Previously known as the Mercer Shares Fund

For more information about the full range of investment options on offer, please call us on 1300 728 928.

Diversified Options

These options offer varying levels of exposure (or potential exposure) to different asset classes to achieve specific investment objectives. In most cases, they provide exposure across the full spectrum of asset classes in Australia and overseas.

They are designed for investors who have an investment objective in mind (e.g. moderate growth, high growth), but are not so sure about how best to assemble the asset class "building blocks" to achieve it.

Sector Options

These options offer exposure predominantly to one major asset class. For example, a "shares option" will invest predominantly in shares and sometimes in that asset class only. These options are designed for investors who want to invest in a particular asset class, or want to assemble their own unique diversified portfolio from the asset class "building blocks" offered by these options.

Use of derivatives in the Mercer Super Investment Trust

Derivatives, such as futures or options, are investment securities whose value is derived from other investments. For example, the value of a share option is linked to the value of the underlying share.

Investment managers may utilise derivatives in managing investment portfolios for the Trustee and in managing pooled investment vehicles in which the Trustee invests. However, the Trustee does not undertake day-to-day management of derivative instruments. Derivatives may be used, among other things, to manage risk (e.g. for currency hedging). Losses from derivatives can occur (e.g. due to market movements).

The Trustee seeks to manage risk by placing limits on the extent of derivative use in any relevant Investment Management Agreement between the Trustee and investment managers.

Derivatives Charge Ratio

Based on information provided by the investment managers, the Trustee is unaware of any period in the year where the Derivatives Charge Ratio exceeded 5%.

The Derivatives Charge Ratio is the percentage of the total market value of the assets of the Mercer Super Investment Trust (other than cash) that the Trustee has charged as security for derivatives investment made by the Trustee.

Liquidity of the Mercer Super Investment Trust

The Trustee's approach to managing liquidity is to ensure, as far as possible, that there will always be sufficient liquidity to meet liabilities when due, under normal and stressed conditions, without incurring unacceptable losses.

Normally a withdrawal request will be completed within 10 business days. However, the Trust Deed permits the Trustee to take up to 60 business days to satisfy a withdrawal request and to extend this period if appropriate.

Where there are insufficient funds to meet the request in the Trust's bank account, the Trustee will take appropriate action (e.g. redeem investments) to create sufficient funds. In such cases the Trustee reserves the right to process the withdrawal using the unit price applying at a later date where it would otherwise prejudice the interests of other unit holders.

Investment risks

As with any investment there is always a degree of risk. The significant risks associated with your participation in the Mercer Super Investment Trust are set out in the following section.

There is a chance that you may get back less than your initial investment, because of taxes, expenses and low or negative investment returns (sometimes referred to as investment risk).

Generally, investment risk is the chance that an investment outcome will be different to what is expected. Investments in the Mercer Super Investment Trust could rise or fall in value or produce a return which is less than anticipated. Rises and falls in value occur for a variety of reasons and sometimes quickly.

The types of investment risks which may have an impact on investment in the Mercer Super Investment Trust include:

- **Individual asset risk** – the risk attributable to individual assets within a particular asset class.
- **Market risk** – the risk of major movements within a particular asset class.
- **Political risk** – the risk that domestic and international political events can impact on investment.
- **Inflation risk** – the risk that money may not maintain its purchasing power due to increases in the price of goods and services (inflation).
- **Derivatives risk** – the risk that exposure to exchange-traded and over the counter derivative
- **Instruments increases the risk in a portfolio or exposes a portfolio to additional risks** – such as the possibility a position is difficult or costly to reverse or that there is an adverse movement in the asset, interest rate, exchange rate or index underlying the derivative.
- **Timing risk** – the risk that, at the date of investment, money is invested at higher market prices than those available soon thereafter. Alternatively, it can also mean the risk that, at the date of withdrawal, investments are redeemed at lower market prices than those that were recently available or that would have been available soon thereafter.
- **Investment manager risk** – the risk that a particular investment manager will underperform (this could be for example because their view on markets is wrong or because of their investment “style” or because they lose key investment personnel).
- **Credit risk** – the risk that a debt issuer will default on payment of interest or principal.
- **Liquidity risk** – the risk that investors will be unable to redeem their investment at their chosen time.
- **Currency risk** – the risk that overseas investments gain or lose value as a result of a falling or rising Australian dollar. Details of the risks that apply to each of the investment options are set out in the table on the following page.
- **Taxation risk** – the risk that taxation laws and their interpretation may change in the future in a manner that may adversely impact the taxation outcomes for either the options themselves or investors into the options.

Before making any investment decisions, you should carefully consider the risks that apply to each of the investment options on offer. This is important as your investment in any of the Investment Options is not guaranteed and you may get back less money than you invest. Investment returns can be volatile and the value of investments may increase or decrease over time. Also you should not rely on past performance as an indicator of the future performance of any of the investment options or treat their respective investment objectives as a forecast or guarantee of future returns.

We strongly recommend that you speak to a licensed, or appropriately authorised, financial adviser before making any investment decisions.

Investment risk table

The table on the following page shows whether there is a low, medium or high likelihood (shown as ‘L’, ‘M’ or ‘H’) that a type of investment risk may apply, from time to time, to a particular Investment Option. The information contained in this table is indicative only and the likelihood that a type of investment risk may apply to a particular Investment Option may change over time.

'n/a' indicates that the investment option was not operating for the full period. The performance information contained in this report is up to date at the time of its preparation.

Investment Managers

The Trustee invests the Mercer Super Investment Trust's assets in a range of funds including:

- Other funds managed by the Trustee including the Mercer Investment Funds (MIFs) and/or the Mercer Multi-Manager Funds (MMFs)
- Directly in a range of investments such as securities, derivatives and cash managed via mandates held with professional investment managers.

Professional investment managers are appointed to manage the assets of the MIFs and MMFs either directly or via external investment vehicles.

The underlying investments of the MIFs and MMFs are invested at arm's length and are separately identifiable.

All of the Trust's assets as well as all the assets of the underlying MIFs and MMFs are held by the National Australia Bank Limited (NAB) as custodian.

This section lists the investment managers of the MIFs and MMFs in which the Trust invests, as well as the professional managers appointed by the Trustee to invest Trust assets via direct mandates as at 30 June 2014.

NOTES:

1. The Mercer Australian Shares Plus Fund includes a 5% allocation to Australian Small Companies
2. Australian Small Caps: IFM appointed in June, replacing Kosmos Asset Management.
3. These manager allocations apply only the Mercer Global Low Volatility Shares Fund and to the global low volatility shares allocations in the diversified Plus funds. Where global low volatility shares allocations exist in non-Plus diversified funds, the allocation is 100% Acadian.
4. This manager is only applicable to the Mercer Passive Global Listed Property Fund and the diversified core funds. Not applicable to Mercer Global Listed Property Fund or to the diversified Plus funds.
5. These managers apply only to the Mercer Listed Property Fund and the diversified funds.
6. This manager is only applicable to the Mercer Passive Global Listed Infrastructure Fund and the diversified core funds. Not applicable to Mercer Global Listed Infrastructure Fund or to the diversified Plus funds.
7. BlackRock appointed in June 2014, replacing State Street Global Advisors.

Largest investment holdings

As at 30 June 2014, the Trust held 91% of its total assets in the Mercer MSIT Growth Fund. There were no direct stock holdings in excess of 5% however the tables below show the top ten Australian and international shares held in aggregate (indirectly) by the Mercer Super Investment Trust as at 30 June 2014. For example, BHP Billiton represents 8.3% of the total Australian shares component of all investment options.

Top 10 Australian share holdings

Investment	% of Australian shares portfolio
BHP Billiton	8.3
Commonwealth Bank Of Australia	8.0
ANZ Banking Group	7.5
Westpac Banking Corporation	7.4
National Australia Bank	5.6
Telstra Corporation	3.7
Woodside Petroleum	2.4
Woolworths	2.3
Rio Tinto	2.3
Oil Search	1.9

Top 10 international share holdings

Investment	% of international shares portfolio
Apple	1.8
Roche	1.0
Johnson & Johnson	0.9
Microsoft Corporation	0.8
Exxon Mobil Corporation	0.8
Amazon	0.7
Merck & Co. Inc.	0.7
Vodafone Group	0.6
Chevron Corporation	0.6
Pfizer Inc	0.6

Some terms explained

Information about each of the Mercer Super Investment Trust Investment Options as at 30 June 2014 is set out in 'The Mercer Super Investment Trust Investment Options' section on page 13. But first let us explain some of the terms used in this Annual Report.

Alternative assets

Alternative assets generally comprise investments which do not fit within the traditional broad asset classes (such as shares, property, fixed interest and cash). Examples may include absolute return funds (e.g. hedge funds), private equity, commodities and various structured products.

Alternative assets may include exposure to international investments which may have foreign currency exposure hedged to Australian dollars.

Asset class

Asset classes are the names given to the different financial categories in which your money may be invested. The major asset classes include shares, property and infrastructure, fixed interest, cash and alternative assets. These asset classes can be broken down further for example to include Australian or international shares, Australian or international fixed interest, direct or listed property investments. All asset classes have different risk and return characteristics.

Benchmark and ranges

The benchmark is the targeted long-term mix of investments. Factors such as the Trustee's assessment of market valuations may cause the actual mix to vary from this benchmark, but it will generally stay within the allocation ranges.

Cash

Cash includes short-term interest bearing investments. Generally, the likelihood of losing the initial investment in cash is minimal. While volatility (the chance of ups and downs) in cash is low, the returns are also likely to be lower than those available from fixed interest, property and shares over the long term.

Consumer Price Index (CPI)

The CPI is used to measure the rate of inflation. In Australia it is based on a selection of household goods and services.

Defensive investments

Defensive investments are types of investments used when trying to protect an investment from the chance of a negative return (in other words the value of the investment falls). Defensive investments tend to produce lower long term but more stable returns than growth investments

Fixed interest

Fixed interest investments (which include inflation linked bonds) are issued to investors by Australian and international governments, semi government authorities and companies in return for cash.

Interest is paid to the investors over the life of the investment, usually at a fixed rate. These investments can generally be bought or sold before they mature, potentially resulting in capital gains or losses. International fixed interest investments are normally hedged to remove the effect of currency movements. Fixed interest investments are likely to be less volatile than shares and property but with a lower expected return in the long-term.

Growth investments

Growth investments are types of investments that have the potential to grow over the long-term but are also likely to experience volatility (ups and downs) in performance from year to year.

Hedging

Hedging refers to the process of protecting investments against, or reducing the risk of, a loss. For example, in the context of currency, the value of international investments is affected by rises or falls in the value of the Australian dollar (e.g. if the Australian dollar rises in value, then international investments in Australian dollar terms will reduce in value).

Investment managers can use various techniques to minimise the effect of currency movements on international investments – this is currency hedging.

Property

Investing directly in office buildings, shopping centres, industrial estates and other similar property investments is known as direct property investment. Investors can also buy units in property trusts, which invest in a variety of properties and property related companies. These trusts and companies may be listed on the Australian Stock Exchange, an international exchange or they may be unlisted. Like shares, a property investment is suitable for long-term investment as it has the expectation of some ups and downs in the short-term. For international property investments, foreign currency exposure is normally substantially or fully hedged to Australian dollars.

Infrastructure

Infrastructure investments are investments made in capital intensive, long term assets required to fulfill major economic and social needs. Characteristics that can be assigned to infrastructure investments include the relatively stable nature of the underlying assets and predictable cash flows which are often linked to inflation in some form. Investors can gain exposure to infrastructure assets through direct investments, unlisted or listed funds or companies with the underlying assets themselves being in Australia or overseas.

Examples of infrastructure assets may include airports, toll roads, pipelines, utilities and social infrastructure. The Infrastructure asset class may include exposure to international investments which may have foreign currency exposure hedged to Australian dollars.

Investment Options

Investment options are made up of different mixes of asset classes. Each investment option has its own investment strategy and objectives. They are designed to offer a range of risk and return options to investors.

Investment option objectives

These identify the type of return the investment option aims to achieve for investors. This is often stated in relation to a relevant index such as CPI.

The objectives of any particular Investment Option should not be treated, or relied upon as a forecast, indicator or guarantee of any future returns or performance for that investment option. The value of each Option may rise and fall.

Level of risk

For each Investment Option we've included the average expected likelihood of the Option giving a negative return (in other words, falling in value). In this context:

- a **'high'** level of risk means that a negative return is expected, on average, approximately one year in every three to five years.
- a **'moderately high'** level of risk means that a negative return is expected, on average, approximately one year in every five to six years.
- a **'moderate'** level of risk means that a negative return is expected, on average, approximately one year in every six to seven years.
- a **'moderately low'** level of risk means that a negative return is expected, on average less than approximately one year in every seven to nine years.
- a **'low'** level of risk means that a negative return is expected, on average, less than approximately one year in every nine years.
- a **'very low'** level of risk means that a positive return is expected over rolling twelve month periods.

These statements are based on historical data and should not be considered to be a guarantee or forecast that a negative return in one year will be followed by a positive return the next year.

Mix of investments

This refers to the asset allocation of an investment option. The actual mix of investments for the Investment Options can be found in "**The Mercer Super Investment Trust's Investment Options**" section on page 13.

Multi-manager investment approach

An investment option structure in which more than one manager may be appointed to manage assets in each asset class, sector or investment style within the investment options.

Performance

Single year and compound returns are calculated assuming that \$1 is invested at the start of the relevant period and that no further amounts are invested over the period. They are based on exit prices and allow for the deduction of investment management fees. Compound returns are calculated as the average of annual returns. For example, if returns are 5%, 6% and 7% over three consecutive years, the compound return is 6% per annum, as the same result could be achieved by earning a return of 6% in each of the three years.

When considering investment decisions, please remember that investment returns over a short time frame (one or two years) should not be considered in isolation. Time frames of five years or longer will provide a more accurate indication of the overall long-term performance of an investment option. In addition, different options may have different levels of risk (see the **Mercer Super Investment Trust's Investment Options section on page 13**), which may lead to different investment returns for each Option.

Finally, don't forget that the value of investments can go up and down and past performance should not be relied upon as an indicator of future performance. The performance information contained in this Annual Report is up to date at the time of its preparation. In future, you can obtain updated performance information by calling 1300 728 928 or accessing www.mercer.com.au/mmf. We can send you a copy of the updated information, free of charge, on request. Performance is also reported in the monthly and quarterly investment updates.

Shares

When buying a share, an investor is actually buying a portion of a company; literally a "share" of it. The investment return will depend on how the company performs over time and on economic factors. Over the long-term, returns from shares have historically tended to be higher than those achieved by property, fixed interest and cash. However, in the short-term, performance tends to have more ups and downs; that is, to experience higher "volatility." The Australian shares and Australian small companies' asset classes may actually include some investments in international shares as a substitute for investments in Australian shares.

An investment in international shares provides exposure to different economies, which may assist in reducing overall volatility via increased diversification. But international share investments are subject to currency movements that can add to, or take away from, the share market return. For example, if the Australian dollar falls in value relative to other currencies, then international share investments will generally be worth more in Australian dollar terms. However, a stronger Australian dollar may take away some of the value of international share investments. "Hedging" international share investments to the Australian dollar can help to even out some of the ups and downs caused by currency movements around the world.

For the diversified investment options, the international shares asset class foreign currency exposure is normally partially hedged to Australian dollars.

Trust Deed

The Trust Deed governing the Mercer Super Investment Trust.

The Trustee may add new Investment Options, close existing Investment Options or alter the

terms of any Investment Option from time to time. You'll be kept informed of any significant changes to the features of the Investment Option(s) in which you are invested.

Mercer Super Investment Trust Investment Options

The following section provides the investment objectives, investment approach, level of risk, mix of investments for each of the Mercer Super Investment Trust Investment Options as at 30 June, 2014. Please refer to the current Mercer Super Investment Trust Product Disclosure Statement for further information.

Mercer Australian Shares

Objectives

- Achieve a return (over the medium to longer term) which is competitive with comparable funds that have similar risk characteristics;
- Outperform the notional return of a benchmark portfolio of suitable market indices over periods of one year or greater.

Investment strategy

The Investment Option invests in Australian shares using a multi-manager approach.

Mix of investments

Growth/ Defensive Exposure	as at 30 June 2014 %	as at 30 June 2013 %
Growth investments	100	100
Defensive investments	0	0

Asset Class	B'mark %	B'mark %
Australian shares	100	100
Cash & fixed interest	0	0

Mercer Diversified Shares

Objectives

- To achieve a return (after tax and investment management fees) that exceeds CPI increases by at least 4% per annum over rolling seven year periods

Investment strategy

The Investment Option invests in a mix of investments using a multi-manager investment approach.

Who manages the Mercer Super Investment Trust?

How is the Mercer Super Investment Trust managed?

The Mercer Super Investment Trust is operated by the Trustee, Mercer Investments (Australia) Limited according to its governing rules and to applicable law. The Trustee holds an Australian Financial Services Licence and a Registrable Superannuation Entity licence.

The Trustee has not incurred any penalties under any relevant legislation during the year ended 30 June 2014.

The directors of the Trustee are:

- D J Anderson
- S M Eagleton
- S G Mather (resigned 30 June 2014)
- B G Bengner
- P J Promnitz (resigned 31 December 2013)
- R G Butler (appointed 29 August 2013)
- M Babbage (appointed 1 July 2014)
- J M Swinhoe (appointed 1 July 2014)

Registered office:

Collins Square
Level 15, 727 Collins Street
Docklands VIC 3008

Service providers to the Mercer Super Investment Trust

The Trustee appoints service providers to assist it in running the Mercer Super Investment Trust. The main service providers to the Trustee are:

- National Australia Bank Limited, the custodian which provides a range of services including custody and unit administration services (such as unit pricing and unit registry services).
- Various investment managers.
- Mercer Outsourcing (Australia) Pty Ltd which provides various fund accounting, tax and income distribution related functions.
- Mercer (Australia) Pty Ltd which provides administrative and operational functions relating to the provision of trustee and financial services.
- Pricewaterhouse Coopers which provides scheme tax and audit services.

Changes to the Mercer Super Investment Trust

Amendment to the governing documents

In November 2013, the trust deed was updated to form a separate stand-alone trust deed for the Mercer Super Investment Trust. Prior to this it has been included in an umbrella deed governing other Mercer trusts.

The provisions of the trust deed otherwise remain unchanged.

Fees and costs

It is important to understand how fees and costs apply in the Mercer Super Investment Trust. The fees and costs may be deducted from your investment account balance, from the returns on your investment or from the Trust assets as a whole.

Investment management fee

The Trustee may engage one or more investment managers to invest and manage the assets of an Investment Option. In doing so, the Trustee may negotiate a fee schedule with an investment manager under which the fee payable by the Trustee to the investment manager increases or decreases based on the overall amount of assets, managed by the investment manager for the underlying funds or direct investments. The investment management fee payable in respect of an Investment Option will not vary for any such increase or decrease in the fees payable to any investment manager, with the exception of any performance fee element as detailed under **Performance fees**.

Where an Investment Option invests in another Mercer fund or a fund managed by another investment manager, the investment management fee includes the investment management fee for the underlying fund/s.

Performance fees

Where an investment manager charges a performance fee, that fee will be passed onto investors by way of an adjustment to the unit price, which will reduce the investment performance of the relevant Investment Option.

Investment managers that charge a performance fee only apply those fees when performance is greater than an agreed target. Accordingly, performance fees arise when higher returns, relative to a specified target for a particular manager, are achieved.

Where an Investment Option invests in another Mercer fund or a fund managed by another investment manager, the performance fee estimate in the **Total fees and charges table on page 18** includes any performance fee estimate for the underlying fund/s.

Administration fee

The Trustee has the right to be reimbursed from the assets of the Trust for all administrative

costs it incurs in the proper performance of its duties in administering the Trust.

The Trustee deducts an amount for expenses out of the assets of each Investment Option, which is called an administration fee.

The administration fee for each Investment Option is passed on to investors by way of an adjustment to the unit price, which reduces the investment performance of the relevant Investment Option.

Indirect cost ratio

Where an Investment Option invests in another Mercer fund or a fund managed by another investment manager, the indirect cost ratio includes the expense allowance of the underlying fund/s where they are known to us and where they are not covered by the investment management fee.

Buy/sell spreads

In addition, for some Investment Options the issue price of units may differ from the withdrawal price of those units. The difference between the issue and withdrawal price represents an allowance for transaction and operational costs. This is commonly referred to as the buy/sell spread.

Additional explanation of fees and costs

Bank charges in relation to your investment may be payable by you. These charges may include telegraphic transfer, bank cheque and dishonour fees.

Details of the fees and costs in dollar amounts that were charged to your individual investment are set out in the periodic statement provided to you in the year ended 30 June 2014.

Further details of the fees and costs applicable for the Mercer Super Investment Trust are set out in the Product Disclosure Statement. To obtain a copy of the current Mercer Super Investment Trust Product Disclosure Statement, contact us on 1300 728 928.

Operational Risk Financial Requirement (ORFR) Reserve

In response to the Government's Stronger Super reforms, the Trustee has established an Operational Risk Financial Requirement Reserve for the Trust. The Government has introduced this requirement so that super funds have access to resources to compensate members, where relevant, for any operational incident that adversely impacts their benefits.

The cost of building up the reserve for the Mercer Super Investment Trust is currently being

met by the Trustee's capital. The size of the ORFR levy will be reported each year in the audited financial statements and is not currently incorporated within the fees and costs for the Trust.

The Trustee will monitor the operational risks and the appropriateness of the ORFR reserve on an ongoing basis and may seek to increase the reserve by applying a levy as a deduction to the investors' account balances in the future.

Total fees and charges for the 12 months to 30 June 2014

Mercer Super Investment Trust Investment Options		Investment management fee* (% pa of your total investment in the Fund)	Performance fee (% pa of your total investment in the Fund)	Administration Fee (% pa of your total investment in the Fund)	Indirect Cost Ratio (% of your total investment in the Fund)	Buy/sell spread (%)
Shares	Mercer Australian Shares	0.90	0.00	0.05	0.04	0.56

* The investment management fees that apply to you may be lower than those referred to above where a reduced fee has been negotiated direct with the Trustee.

Your Privacy

We take your privacy seriously because we know you do. All personal information is dealt with in accordance with the Mercer Privacy Policy. The Mercer Privacy Policy details how we comply with the Privacy Act in the handling of your personal information. You should familiarise

yourself with Mercer's Privacy Policy to ensure that you understand how Mercer collects, uses and discloses your personal information. You can view the Mercer Privacy Policy via our website at www.mercer.com.au.

It is important to ensure that the personal information we retain about you is accurate, complete and up-to-date. Accordingly, if you have any concerns about the completeness or accuracy of the information we have about you or would like to access or amend your information, simply call us on 1800 512 947.

Enquiries, complaints & communication

Enquiries and complaints procedures

The Trustee has a process in place for dealing with any enquiries or complaints you may have. If you have any enquiries or complaints you can write to:

Mercer Investment (Australia) Limited
GPO Box 9946
Melbourne
VIC 3001
Or call on 1300 728 928.

We will acknowledge complaints within 14 days and will communicate our decision to you within 45 days.

If you do have a complaint and you're not satisfied with the response, you can request that the Complaints Officer pass on your complaint to the Trustee's Complaints Committee for a formal reconsideration. While you can expect a decision from the Complaints Committee within a further 28 days, sometimes a longer period is required.

The Trustee always seeks to resolve any complaints to the satisfaction of all concerned and in the best interests of all the investors of the Trust. However, if after waiting 45 days or you are not satisfied with the outcome of your complaint, you may be able to take your complaint to the Financial Ombudsman Service (FOS). FOS is an external dispute resolution system that covers certain complaints by investors in pooled superannuation trusts.

For more information, you can contact FOS at:

Telephone: 1300 78 08 08

Facsimile: (03) 9613 6399

Website: www.fos.org.au

Email: info@fos.org.au

Mail: GPO Box 3, Melbourne, Victoria, 3001

Further information available on request

Investors are entitled to inspect the governing rules and copies of certain accounts, annual reports and returns. Certain other information is also available on request. You can arrange to see these documents during business hours free of charge by lodging a written request with the Trustee.

Keeping you up-to-date

As an investor in the Mercer Super Investment Trust you will receive:

- a transaction advice confirming every investment, withdrawal or investment strategy alteration to your existing investments;
- a monthly advice confirming the value of your investments;
- a concise monthly investment report (available via www.mercer.com.au/mmf);
- a detailed quarterly investment report (available via www.mercer.com.au/mmf);
- an annual statement; and
- this annual report which provides statutory and other useful information.

Financial Information

This information is a summary of the Mercer Super Investment Trust's audited accounts for the year ended 30 June 2014. The full audited accounts and auditors report are available and you can request them by contacting us.
